We are committed to integrity and compliance in everything we do. From our manufacturing facilities to our boardrooms, our people uphold the highest standards.

Every company that purchases or every person that uses Multivision technologies is key to our success. Our people strive to ensure that we exceed their expectations, through the quality and high performance of our solutions and the services we deliver.

VISION

Our vision is to become the premier global security solutions specialist by providing the world's best, most innovative and value-add surveillance offerings as well as the most responsive customer service.

Multivision is to utilize vast experience of many years in the surveillance industry to deliver top of the line integrated security & surveillance solutions at competitive cost to make people of Pakistan feel safe & protected for their buildings, properties and life.

MISSION

Our mission is to contribute to a safer and more secure world through a commitment to innovation and by fostering a culture of creativity.

Multivision's mission is to continue to provide the best security and surveillance solutions to protect today's generation and become part of the efforts of country leadership in providing safe, secure and peaceful future to our next generations.

PRODUCTS

CCTV SURVEILLANCE SYSTEM

IP and Analog based HD CCTV cameras are high resolution color cameras designed for general cost effective surveillance applications where a color image and object detection is required.

These cameras can be used indoor or outdoor

FIRE ALARM SYSTEM

An automatic fire alarm system is designed to detect the unwanted presence of fire by monitoring environmental changes associated with combustion. In general, a fire alarm system is either classified as automatic, manually activated, or both. Automatic fire alarm systems can be used.

WALK THROUGH GATES AND ACCESS CONTROL MACHINES

Sensitive operational areas can be protected with access control system which provides access to Authorized personnel but prohibits entry of unauthorized persons. Access Control solutions are essential to prevent unauthorized people from entering a building or restricted area.

These solutions help to develop e-security at certain reliable level. The bottom lines of these solutions are the replacement of mechanical locks and keys with electronic proximity readers and tags.

Following Features:

- Using high density fireproof material.
- Program Self-diagnostic when power on, no need initial or periodic calibration.
- Modularization design, easy for maintenance and replacement.

TIME ATTENDANCE

Time Management System is the key to proficient and successful time tracking and management in your workplace which allows you to collect and organize your employee time data simply and accurately.

A better time management leads towards organizational success.

HOME AUTOMATION

Smart home automation devices connect appliances, switches, and gadgets to a central hub, enabling you to control those devices in secure and convenient ways. Command groups of lights to turn on or off when you open the front door, program your thermostat to work with your fans and AC when the room gets hot. Smart home automation devices make your home more comfortable, and more secure than ever.

LAN/WAN NETWORKING SYSTEM

The LAN and WAN professionals at Multivision provide managed IT services that are designed with your business in mind. Read more about WAN/LAN services below, and discover how our many other IT advisory services can take your business to the next level.

PABX SYSTEM

A Private Automatic Branch Exchange (PABX) is a viable VoIP alternative. This system makes it possible to have many lines of access using a few connections to the public network. This network is also called the public switched telephone network (PSTN).

Time and technology, however, have changed the consumer telephony landscape, with the flag-bearer being the Open-Standards-based IP PBX. The point of the “IP” in this new era is that the phone calls are delivered using the Internet Protocol as the underlying transport technology.

HOME SECURITY SYSTEM

Comfort, security and energy management with Multivision home automation, in case of a renovation or a new home or building. For over 30 years, Multivision offers home solutions tailored to your needs. Close your curtains with one click, dim your lights for a cosy night in or turn off everything when you leave the house.
